

Piyush Dev

piyushdevmgr@gmail.com | Github | LinkedIn | +91-9304868598 | Munger, Bihar, India

EDUCATION

- **National Institute of Technology Mizoram** Aizawl, India
Bachelor of Technology in Computer Science & Engineering; CGPA: 9.38/10 Aug. 2023 – Present
- **Sainik School Kalikiri, Kalikiri** Andhrapradesh, India
Matriculation: 92.8 and Intermediate: 90.4 2015 – 2022

EXPERIENCE

- **Vyorius Drones Pvt. Ltd.** Remote
React Intern – Testing and Automation May. 2025 – Aug. 2025
 - **UI Optimization:** Enhanced drone management dashboards through performance tuning and responsive design improvements.
 - **Automation:** Built automated testing pipelines to ensure UI reliability and feature consistency.
 - **Collaboration:** Worked closely with developers and QA teams to refine workflow automation and reduce manual testing time.
- **Trivon Ventures** Remote
Software Development Intern Mar. 2025 – Apr. 2025
 - **Software Development:** Developed Whatsapp bot that efficiently shared memes on the topic sent by the user.
 - **Project Integration:** Contributed to the complete workflow of the project from database to user interface.
 - **Bug Resolution:** Diagnosed and fixed system-level issues, enhancing product stability and deployment efficiency.

PROJECTS

- **MAPP – Mizoram Agriculture Precision Project:**
 - Developed an AI-powered mobile platform providing soil analysis, plant disease detection, weather alerts, and crop market predictions for Mizoram farmers.
 - Implemented ML models (98% accuracy in prototype testing) using image processing, sensor data, and cloud-based forecasting engines.
 - Designed offline-first architecture with real-time recommendations for yield optimization in remote regions.
- **BlueCode – Online Code Editor:**
 - Created an online code editor supporting multiple languages with real-time execution and output display.
 - Integrated voice command features and user file storage using cloud-based APIs.
 - Built with React, Node.js, Express, and Python for backend code execution.
- **Begin – Startup Ecosystem Portal:**
 - Designed a full-stack web platform connecting entrepreneurs, investors, and customers.
 - Integrated chatbot (PyTorch), funding predictor (Random Forest), and real-time chat system (Socket.io).
 - Implemented user authentication, profile dashboards, and data-driven analytics for engagement insights.
- **Food Delivery Website:**
 - Developed a dynamic food delivery platform with restaurant management, live order tracking, and chatbot assistance.
 - Built using React, Node.js, Express, and MongoDB; integrated Direction API for delivery route optimization.
 - Designed responsive UI and implemented secure payment and authentication modules.

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, SQL, Java, C
- **Web Development:** ReactJS, Node.js, Express.js, MongoDB, Bootstrap, REST APIs, Docker, AWS
- **Machine Learning:** TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook
- **Concepts:** Data Structures & Algorithms, OOP, Database Design, Git/GitHub, Workflow Orchestration (Hugging Face, OpenAI, Gemini)

ACHIEVEMENTS & ACTIVITIES

- **Smart India Hackathon:** Selected to represent NIT Mizoram in the national-level hackathon.
- **Yuvamanthan Hackathon:** Winner – proposed an innovative digital solution for Climate and Disaster Management.
